

DEAN INSTITUTE OF TECHNOLOGY CELEBRATES ITS 65TH ANNIVERSARY

In a proud statement issued from their company headquarters, James Dean, the President of Dean Institute of Technology announced that 2012 is the 65th anniversary of the founding of our school.

The school was started back in 1947, the same year that the American Helicopter Society revealed a device that could be strapped to the body. It was a possible mode of transportation to replace the streetcar, which carried its last passenger in Manhattan this year. Most likely though, the majority of New Yorkers preferred riding the Diesel Bus system. Many other milestones occurred in 1947 including the opening game of the World Series being the first World Series game to be telecast. The 1947 World Series brought in an estimated 3.9 million people, becoming television's first mass audience. The first presidential address is telecast from the White House. The minimum wage in America is 40¢ per hour; a new Ford or Chevrolet sedan sells for less than \$2,000 and milk goes for 20¢/quart!

Yes, when you think about it, things have changed a lot in 65 years. But after all this time there are some things which have remained the same.

One good thing is that Dean Institute of Technology is still around and thriving after 65 years of hard work and lots of dedication by everyone involved...

...And most importantly, the caring about all of the students who have helped us to reach this milestone.
